## Landmark Surgery at Zulekha Hospital

Julia (true name withheld on request) is 4kgs. lighter in two days thanks to the swift and a stunning keyhole surgery performed by Dr. Neeta Warty and her team (Dr. Kapra, Dr. Rafid) at Zulekha Hospital in Dubai

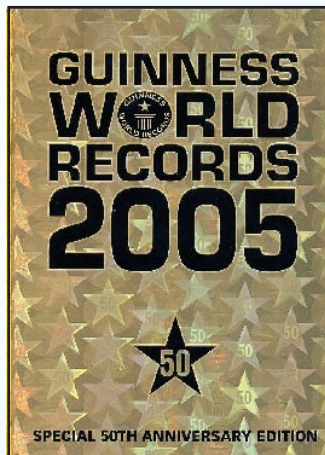

Over the last 4 years Julia had been diagnosed with an incapacitating fibroid. Fibroids are non-malignant growths in the wall of the uterus. On many occasions they are asymptomatic but can grow and cause pain, bleeding, pressure symptoms and infertility. The pain and discomfort would prevent Julia from attending work. The growth had now grown to the size of 9 month pregnant uterus. She had sought opinions from many parts of the world including Dubai and London and was told that she would need major surgery, which would keep her in bed for at least 10 days. In fact, several doctors had refused to operate due to the risks involved. Dr. Archana Gupta, Gynecologist at Zulekha Hospital counseled Julia about the possibility of a laparoscopic removal of the fibroid while achieving conservation of her uterus. Julia's aunt who is a consultant with the NHSS in UK and who was present with Julia's Parents during this 3 hours and 40 minutes bloodless surgery was overwhelmed with her niece's swift surgery and quick recovery. She said, "the blood loss was less than the half a (500ml.) bottle of sprite!" Julia was ambulatory within 24 hours of the laparoscopy and according to the local gynecologist, Dr. Jasbir Chatwal, she is fit to resume work in a week's time and will be fit to travel to Belgium on business soon. Dr. Neeta Warty is optimistic that post surgery Julia will be able to conceive naturally.

Dr. Neeta Warty is a pioneer in the field of endoscopic surgery known as non-invasive or keyhole surgery. She received her advanced training in Laparoscopy at the Friedrich Schiller University, Jena, Germany with Professor Possover and Dr. Sinha in India. However she is currently invited faculty to the same institute where she received training due to her advanced surgical skills. She has been invited by several Hospitals in the UK, Canada, Switzerland, and USA to perform procedures, which require tremendous skill. She has performed more than 10500 endoscopic surgeries and is credited to have removed the heaviest fibroid in the world. Weighing 3.4kgs this was acknowledged in the Guinness and Limca books of records. She is one of the few surgeons who performs the entire operation relating to uterine cancer by means of keyhole surgery and has trained more than 800 national and international surgeons in the last twelve years.

Shaw's textbook of Gynecology for postgraduates has acknowledged her innovative contribution to laparoscopic treatment of uterine prolapse, a technique that is so impressed British surgeon Mr. Alfred Cutner that he adopted it for use in UK. She is the recipient of the national FOGSI Corion award. A state level swimmer and a nature lover, she has many hobbies such as organic farming.

Dr. Neeta Warty visits Zulekha Hospital where she holds several in-house training programs and will hold a Laparoscopic workshop at Zulekha Hospital.

## Dr. Neeta Warty featured in Guinness Book of World Records

Dr. Neeta Warty along with Dr. Sinha had in 2000 successfully removed the heaviest Fibroid from inside the uterus of a woman using key hole (Laparoscopic) surgery. The 3.4kg fibroid removal that took place at REAMS hospital in Mumbai, India was featured in the Guinness Book of World Records.

### CERTIFICATE

**The heaviest fibroid weighed  
3.4 kg (7 lb 8 oz) and measured 20 x 12 cm  
(7.8 x 4.7 in) from the uterus of Meena Patel  
(India). The fibroid was removed by a team  
of surgeons led by Dr. Rakesh Sinha and  
Dr. Neeta Warty (both India) at the  
Bombay Endoscopy Academy and Centre  
for Minimally Invasive Surgery, Mumbai,  
India, on the 25th December 2000.**

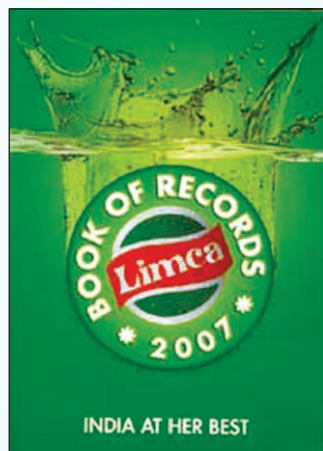

GUINNESS WORLD RECORDS LTD

## Dr. Neeta Warty featured in Limca Book of Records

**First unicompartmental knee arthroplasty**  
Knee specialist Dr Ashok Rajagopal performed a unicompartmental knee arthroplasty (UKA) — minimally invasive partial knee replacement surgical procedure to increase mobility in patients afflicted with osteo and rheumatoid arthritis — at Sitaram Bhartiya Institute of Science and Research, Delhi in April 2002. UKA (two inch incision), in which, of the three compartments in the knee, only the arthritis-affected one can be replaced, reduces pain and expenses and shortens hospital stay. Introduced in the 1970s by Dr Marmor as an alternative to traditional knee replacement (11-14 inch incision), Dr Rajagopal and a team of Australian doctors further modified the procedure after extensive research in the late 1990s.

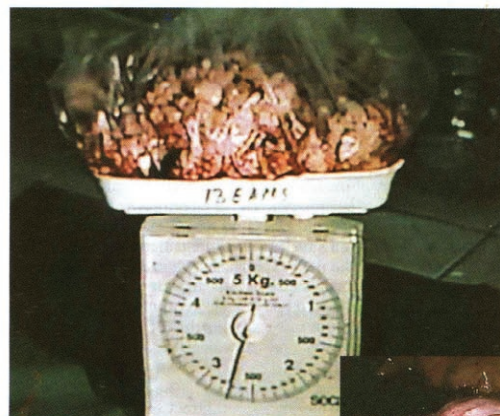

### Fastest LTT

Dr Lalit Mohan Pant, Surgeon Medical Officer, Dept. of Health & Family Welfare, M.P. can perform a Laparoscopic Tube Tying (LTT) operation within 20 seconds tying up the fallopian tubes. Since 1991, he has performed 1,03,639 LTTs. His highest in a year was 24,968 LTTs in 2000-01 and 816 operations in a day on Dec. 26, 2000. He has won the 'Highest Number of Family Planning Operations Award in M.P. State' — given by the Association of Surgeons of India — consecutively since 1994.

Dr Y.S. Raghuvanshi of District Hospital, Guna, M.P. performed 596 LTT operations in 11 hours on Dec. 12, 2001 at two camps (293 in Chanderi in five hours and 303 in Esagarh in six hours). In 2001-02, he performed 4,000 LTTs.

### First keyhole bladder removal

Dr Inderbill Gill from Cleveland Clinic, Ohio removed a cancerous bladder through a keyhole surgery at the Dept. of Urology, AIIMS, New Delhi on Feb. 21, 2000. Such laparoscopic radical cystectomy had been performed only twice earlier — both at Cleveland, Ohio.

### Largest laparoscopic myomectomy

A team of surgeons led by Dr Rakesh Sinha and Dr Neeta Warty at Bombay Endoscopy Academy and Centre for Minimally Invasive Surgery (BEAMS)

laparoscopically removed a fibroid weighing 3.4 kg from the uterus of Noorjahan Markar (38) of Mumbai on Dec. 25, 2000. The patient had several fibroids of which the largest measured 20 x 12 cm. The fibroids were removed through a hole as small as 5-10 mm. The patient had a reaction to blood later in the evening for which she had to undergo hysterectomy. BEAMS, an exclusive endoscopic centre for women opened in 1994.

### Largest laparoscopic hysterectomy

Dr Rakesh Sinha and his team at BEAMS laparoscopically removed a fibroid uterus of a 44-year-old woman from Mumbai on Nov. 21, 2000. Although the laparoscopic removal of uterus is now quite common (the first womb was removed through an abdominal hole as small as 5-10 mm in 1989 in the USA), this case was unique as her uterus measuring 21 cm weighed 2.7 kg,

nearly as large as a new born child. (Patient's name withheld on request.)

Conventionally hysterectomy is either done through a large cut made in the abdomen or vaginally. A normal uterus weighs 70 gm and measures around 7.5 cm.

## FOGSI-CORION AWARD

Dr. Neeta Warty has been felicitated by the FOGSI-CORION Award for the year 2007. She was conferred this commendation by the Federation of Obstetrics and Gynaecological Society of India for her extensive scientific research work carried out in the field of Obstetrics and Gynaecology among the senior members of the Gynaecology society.

### FOGSI-CORION AWARDS-2007

Senior Category  
*Runners-up Commendation*

THE FEDERATION OF OBSTETRIC AND GYNAECOLOGICAL SOCIETIES OF INDIA

*is pleased to confer this honour of commendation*

*on*

**Dr. Neeta Rajeev Warty**

*First Runner-up*

*for*

*The Best Scientific Research Work in Obstetrics & Gynaecology  
amongst the Senior members*

*on the occasion of*

*the 51st All India Congress of Obstetrics & Gynaecology  
held at New Delhi from 2nd to 5th February, 2008*

  
**Narendra Malhotra**  
President  
FOGSI

  
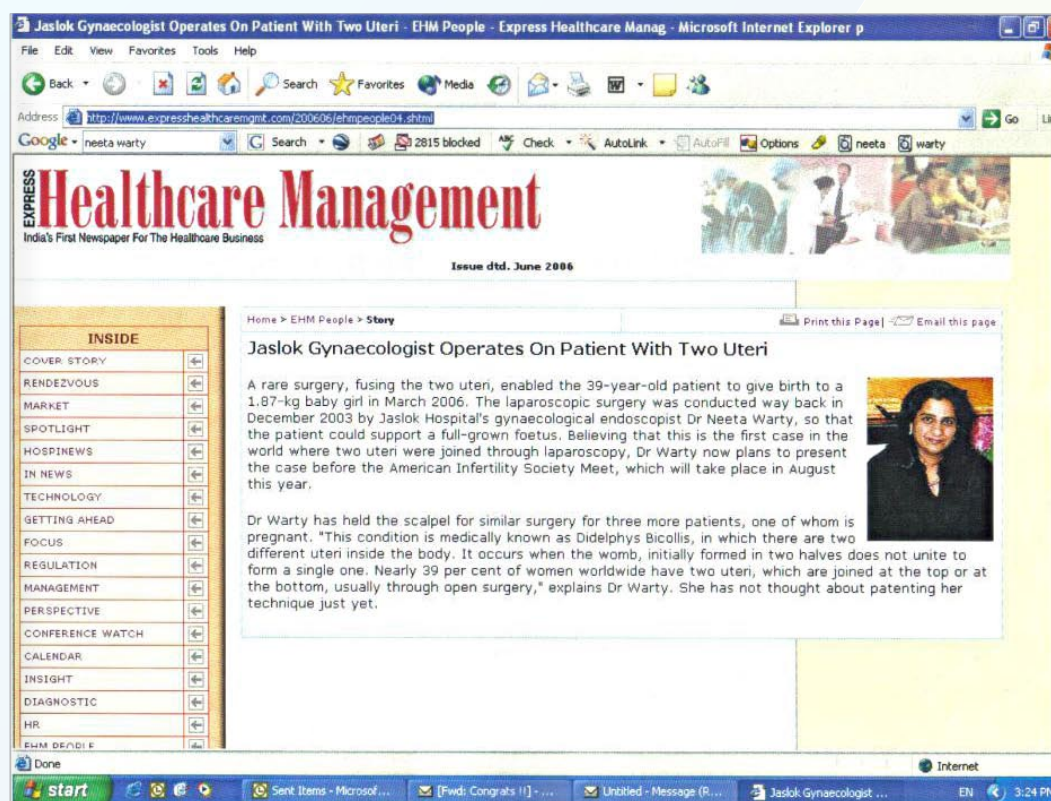

**Dr. C.N. Purandare**  
Secretary General  
FOGSI

  
**Dr. Mrs. S. S. Trivedi**  
Organising Chairperson  
51st AICOG, New Delhi

  
**Dr. Usha Gupta**  
Organising Secretary  
51st AICOG, New Delhi

## Endoscopic surgery on Patient with two Uteri

Dr. Neeta Warty was featured in the Journal of Healthcare Management for successfully carrying out keyhole surgery on a patient with two Uteri at the Jaslok Hospital in Mumbai, India.

## Unique feat of conducting 30 surgeries in 19 hours

Dr. Neeta Warty holds the unique feat of conducting 30 succesful endoscopic surgeries in a non-stop stretch of 19 hours. This made headlines and was featured in several news publications all over India.
